

Hazardous Chemical Agent Management Training

TPDOUBLEO SHE COMPLIANCE

Introduction

Welcome to the Hazardous Chemical Agent Management Training prospectus, presented by **Tpdoubleo She Compliance**. This comprehensive 1-day course is designed to equip participants with the knowledge and skills necessary to effectively manage hazardous chemical agents in the workplace, ensuring compliance with relevant legislation and promoting a safe working environment.

Tpdoubleo She Compliance is a QCTO Accredited, Department of Labour CI Registered, and a SAIOSH Corporate Member, committed to providing high-quality, industry-relevant training solutions.

Course Overview

This intensive training program covers essential aspects of hazardous chemical agent management, from identification and risk assessment to control measures and emergency response. Participants will gain a thorough understanding of their responsibilities under South African legislation and best practices for minimizing chemical-related hazards.

Key Learning Objectives

Upon completion of this course, participants will be able to:

- Identify and classify hazardous chemical agents.
- Conduct comprehensive risk assessments related to chemical exposure.
- Implement effective control measures to minimize chemical hazards.
- Understand the requirements of relevant South African legislation (e.g., OHS Act, Regulations for Hazardous Chemical Agents).
- Develop and implement emergency response procedures for chemical incidents.
- Properly store, handle, and dispose of hazardous chemicals.
- Interpret Safety Data Sheets (SDS) effectively.

Course Content

The course covers the following key topics:

1. **Introduction to Hazardous Chemical Agents:** Definitions, classifications, and sources.
2. **Legal Framework:** Overview of relevant South African legislation and standards.
3. **Hazard Identification and Risk Assessment:** Methods for identifying chemical hazards and assessing associated risks.
4. **Control Measures:** Engineering controls, administrative controls, and personal protective equipment (PPE).
5. **Safety Data Sheets (SDS):** Understanding and interpreting SDS information.
6. **Storage and Handling:** Safe practices for storing, handling, and transporting hazardous chemicals.
7. **Emergency Response:** Procedures for dealing with chemical spills, leaks, and other emergencies.
8. **Waste Management:** Proper disposal of chemical waste.
9. **Practical Examples and Case Studies:** Real-world scenarios to enhance understanding and application of concepts.

Target Audience

This course is designed for individuals who work with or are responsible for managing hazardous chemical agents in the workplace, including:

- Safety Officers
- Supervisors
- Managers
- Employees involved in handling chemicals
- Health and Safety Representatives
